## PROFESSIONAL SUMMARY

As a current student at the UCONN Coding Bootcamp for the full-stack development program, I have gained a lot of knowledge in the development world. As an aspiring developer, I am working on enhancing my skills and applying what I am learning in real projects during the program which is paving the way to entering the work force.

My previous experience working in the sales department of a software development company gave me a wider view of what the clients expect and helped me be better equipped to work internally with a team to fulfil a common goal.

---

### Technical Skills

- HTML 5
- CSS 3
- Bootstrap 5
- Foundation 6
- JavaScript
- jQuery
- Node .js

### Other Skills

- Project Management & coordination, communication, time management
